## Supporting you through every day of your mobility journey

Manual attendant controlled wheelchair designed for moderate to complex postural seating needs. 45° of tilt in space allows for regular changes in position to improve respiratory function, visual orientation, facilitate feeding and reduce pressure beneath the pelvis.

All Chunc One chairs feature built in adjustment to cater for your child’s growth or react to requirements of progressive diseases. Durable, functional and user-friendly for everyone.

### Client profile

- Suitable for individuals from 3 years old up to 6’2” and 110 kg (17 stone).
- Neuro disabilities – Cerebral Palsy, muscular dystrophy, motor neurone disease.
- Loss of range of movement affecting posture and function .
- Acquired or developmental brain injury.
- Chronic loss of joint motion (flexor contractures) limiting active and passive movement.

### Feature

- Up to 45 degree tilt in space.
- Available in 5 sizes: XS-XL – ready for when you grow (depth, width and back height).
- Smooth and controlled tilting, with back recline option up to 180° to assist with personal care .
- Multiple positioning and support option:
  - Encourage midline, support the spine and maintain pelvic position in neutral alignment.
  - Improve visual alignment by supporting the head in an upright position.
  - Positively affect critical functions including respiration, swallowing, positioning, socialisation.
  - Height and angle adjustable handles to fit varying caregiver heights and enable pushing from a tilted position.
  - Encourage independence and maximising the user’s own capabilities as much as possible.
- The Chunc One is a front-facing wheelchair designed for safe transportation in adapted vehicles. It is certified at 90 degrees to the crash test standard ISO 7176-19:2022.

### Benefits

- Designed with comfort, versatility, stability, and style in mind, so you can move around with ease and confidence
- Natural healthy alignment of the pelvis and trunk to support function and comfort
- Adaptable for active and passive sitting posture to support both function and relaxation
- 45° change can reduce pressure by up to 30%. Tilting at varying degrees through the day supports positioning and re-positioning as well as pressure relief
- Power assist option – confidence and freedom to do more
