

Hilo

The Chunc Hilo has been designed specifically for school and home environments creating a stable base for easy table height adjustment.

The 'tilt' in space feature allows the seat to be tilted without affecting the balance and stability between the seat and chassis. The range of tilt is between -25° and +15° prone.

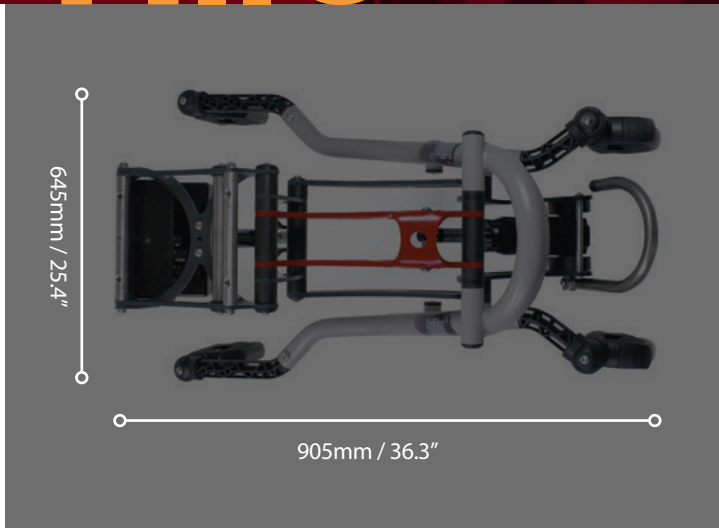

There are two options either powered or foot pump versions.

The choice of castors and wheels allows choice of where the chair can be used in the home and school environment.

- Powered or foot pump version
- 'Tilt in Space' -25° to +15° prone
- Rear wheel or castor option
- Large rear wheel version has anti-tips and brakes
- Lockable castors
- Maximum user weight 75kg
- Weight of chassis 20kg
- Height adjustment 310 - 650mm
- For use in schools and home environments
- One size frame, growth adjustment
- Designed to allow the Chunc Sit seating system to be fitted. This can either be fixed or detachable.
- Other seating systems can be fitted, please contact Chunc for more information.
