

# SPICA

**The Chunc Spica offers a post operative mobility solution for children and young people in hip spica casts and other requirements such as radial leg extension braces.**

Highly configurable leg supports and backrest are able to accommodate the awkward position created by the large post operative plaster.

The Chunc Spica facilitates early discharge from the hospital environment to the comfort and security of the home. Furthermore, having being crash tested (suitable for transportation) the chair allows continued participation in the social, education and therapy environments.

- Suitable as a forward facing seat in a motor vehicle
- Crash tested to ISO 7170 (ANSI ROSNA part 19)
- Anti tips as standard
- Brakes fitted as standard
- Swing away footrests as an option
- Height adjustable push handles
