Are there any postural or range of movement limitations?

--

- A. Back Height.** This is how tall the back of the chair needs to be.
Think: Measure from the top of your shoulder down to where your bottom touches the seat.
- B. Lower Leg Length.** This tells us how high the footrests should be.
Think: Measure from the back of your knee down to your heels while sitting.
- C. Seat Depth.** This helps us choose how deep the seat should be.
Think: Measure from the base of your spine (where your lower back meets the seat) to the back of your knee.
- D. Seat Width.** This ensures the chair isn't too tight or too wide.
Think: Measure the width of your hips from the outside of one hip to the outside of the other.

Please specify your measurements using the above guides
